AN AWESOME QUARTER ACRE!

This is some very impressive hills buying! Set on a huge quarter-acre block of land, this one is very special.

A brick-and-tile home built sometime around 1960, we've got all the character of that time in history, with feature cornices, timber floors, and all the appeal of the era.

LIVING HERE

See the floor plan for more details on how it's all set up. The living area is a great size, and the separate kitchen and meals area is very well set up. The kitchen has plenty of workspace and there's ample room for a good size dining table. The bedrooms are all of a good size and there's plenty of room for larger furniture styles with this configuration.

The enclosed back patio has plenty of room for additional storage or indoor/outdoor living. It leads out to the backyard, where there's another patio and space. So much space. It's a proper quarter-acre block. You've got room for kids, pets, projects, gardens, and chickens.. there's even room for a goat or a pony or an alpaca. (You can't have one, but there's room for one!) It's a hard thing to find these days, especially at a price like this.

It's a unique opportunity in a location that is so close to so much.
