Riverside Retreat

36 hectares (or 90 acres) of mostly virgin bushland and with a couple of nice clearings and river flats to run a few livestock. There are some great swimming holes and a sandy beach along your own stretch of the Shoalhaven River- and adjoining Deua National Park-what more could you wish for?

The three bedroom home sits in a commanding position overlooking the valley and to the mountains beyond, off grid solar powered it just keeps getting better. A new 'Necter"wood heater with oven has recently been installed. The ability to pump water from the river with riparian rights opens lots of opportunities to be completely self sufficient. This is a home that would suit the full time occupier as it used currently or equally suitable for a weekender with so much going for it.
